

I am writing in response to the NAB's petition 04-160. I think, since we pay for this coverage from satellite radio, it should not affect them. It is a very important service to myself and others like me that drive professionally. I can now go direct to a channel and get real time updates to traffic and weather on my destination, rather than wait until I am in range of a local channel, hoping I don't have to listen for an hour or more to get an idea of what is happening in the area.
